BACKGROUND

With the emerging growth of Indian economy and its increased dependability on the green energy and renewable sector, it is evident that transitioning to a greener approach for a sustainable economic growth is highly desirable. The falling costs of renewable energy, ambitious government plans for rapid deployment of renewable energy and increasing financial support from international governments and investors all indicate that the transition to a low-carbon economy based on this green approach is not only possible, but already underway.

Considering that fact, it is highly important to bring together all the small, medium and large players under a common roof through recognition on their green initiatives taken. This has presently become an emerging trend to honour them with the Green awards, which not only celebrate the spirit of the new challenges involved in the sector as well as to ensure further growth in this sector through appreciation. This particular approach has a vision to move forward with the concept of a greener world, where India being a significant part of the same.

PURPOSE OF THE EVENT

The overall purpose of the event is to strengthen the ongoing practices of appreciating the innovation and quality and to involve more participation in the green initiatives from not only the large scale project owners/companies, but also the small and medium players.
